EDUCATION

Raj Kumar Goel Institute of Technology , Ghaziabad	2022 – 2026
Bachelor of Technology (B.Tech) – Computer Science & Engineering (AI/ML) CGPA: 8.30 / 10	
St. Conrad's Inter College , Agra <i>Indian School Certificate (ISC)</i>	2021 – 2022
Class XII Board Examination Score: 80%	
St. Conrad's Inter College , Agra <i>Indian Certificate of Secondary Education (ICSE)</i>	2019 – 2020
Class X Board Examination Score: 80.1%	

PROFESSIONAL EXPERIENCE

Qmansys Infosolutions LLP — LIVE DEMO	Jul 2025 – Oct 2025
<i>AI / Machine Learning Intern</i> New Delhi, India	
- Developed an AI-powered EEG Brainwave Analysis System using Machine Learning to predict emotional and cognitive states, boosting classification accuracy by 14% (achieving 92% overall accuracy) using custom SVM and Random Forest models. - Engineered end-to-end EEG preprocessing (bandpass filtering, artifact removal), feature extraction (Power Spectral Density), and optimized model pipelines, reducing inference latency by 24% for real-time applications. - Integrated trained ML models into a deployment-ready GUI using Streamlit and FastAPI, enabling real-time visualization of brainwave patterns.	
NASSCOM FutureSkills Prime	2024 – 2025
<i>AI & Machine Learning Industry Training (1 Year)</i> India	
- Completed a comprehensive 1-year industry-aligned training curriculum specializing in Artificial Intelligence, Machine Learning, Deep Learning, Computer Vision, and Natural Language Processing (NLP). - Built and deployed 6+ practical, hands-on AI projects using Python, TensorFlow, PyTorch, Scikit-learn, OpenCV, and Git to apply models to real-world datasets.	

PERSONAL PROJECTS

ClipInsight AI — Multimodal AI Video Intelligence Platform GitHub	2026
- Developed a multimodal video intelligence platform using FastAPI, OpenCV, Whisper, and Google Gemini to analyze short-form videos, reducing API query latency by 35% using asynchronous task queues. - Integrated Retrieval-Augmented Generation (RAG) with Gemini Pro and Whisper API, achieving 92% precision in hook and topic detection. - Designed an end-to-end processing pipeline for frame extraction, speech-to-text transcription, semantic vector retrieval, and automated report generation.	
LLM Guardrails Gateway — Enterprise AI Safety Middleware GitHub	2026
- Built enterprise-grade safety gateway for LLMs, protecting against prompt injections (98% jailbreak detection rate) and masking PII with < 45ms overhead latency using optimized regex matching and classification. - Implemented dynamic policy enforcement, toxicity filtering, and topic alignment rules using FastAPI, Next.js, Prisma ORM, and SQLite. - Designed a web-based dashboard with Framer Motion and React to visualize safety logs, policy controls, and real-time database audits.	
Eye Assist — Medical AI for Retinal Disease Detection Live Demo	2026
- Developed a deep learning-based retinal disease detection system using CNNs (ResNet50 / MobileNetV2) and Transfer Learning, achieving 94.2% classification accuracy on fundus images. - Designed preprocessing, data augmentation, and class imbalance handling pipelines in TensorFlow and PyTorch, reducing model overfitting by 18%. - Implemented Explainable AI (XAI) using Grad-CAM to visualize model prediction weights, providing clinical decision support.	

TECHNICAL SKILLS

Languages: Python, SQL, Java, C
AI / Machine Learning: PyTorch, TensorFlow, Scikit-learn, OpenCV, Computer Vision, Deep Learning, CNNs, Transfer Learning
Generative AI: Large Language Models (LLMs), RAG, Prompt Engineering, Google Gemini Pro, Whisper AI, Vector Search & Databases (ChromaDB)
Backend & APIs: FastAPI, REST APIs, Streamlit
Developer Tools & Deployment: Git, GitHub, Docker, Vercel, Render, Railway, SQLite, Prisma ORM, VS Code, Jupyter Notebook
